Ring size guide

Print at 100% scale on A4. Takes two minutes with a ring you already wear.

1. Print and check the scale

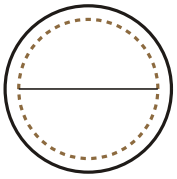

In the print dialog choose 100% or 'Actual size'. Do not tick 'fit to page' or 'scale to fit'. Then measure the bar below with a ruler.

Check the scale: this bar must measure exactly 40 mm. If it does not, print again at 100% (no 'fit to page').

2. Match a ring you already wear

Take a ring that fits the finger you are buying for. Place it over the circles on page 2 until the inside edge of the ring sits exactly on the outline of a circle. That circle is your size.

inside edge of the ring on the outline

Between two sizes? Choose the larger one. Wide bands (over 6 mm) often need half a size up.

Convert US, UK and Indian sizes with the table on page 3, or let us do it: send a photo of the ring on the circle to WhatsApp.

3. No ring at hand? Use a strip of paper

Cut a strip of paper 5 mm wide. Wrap it around the base of the finger, snug but not tight, and mark where it overlaps. Measure the length in millimetres: that number is your Indian/European size (for example 52 mm = size 52). Measure in the evening, when fingers are at their largest, and make sure the strip passes over the knuckle.

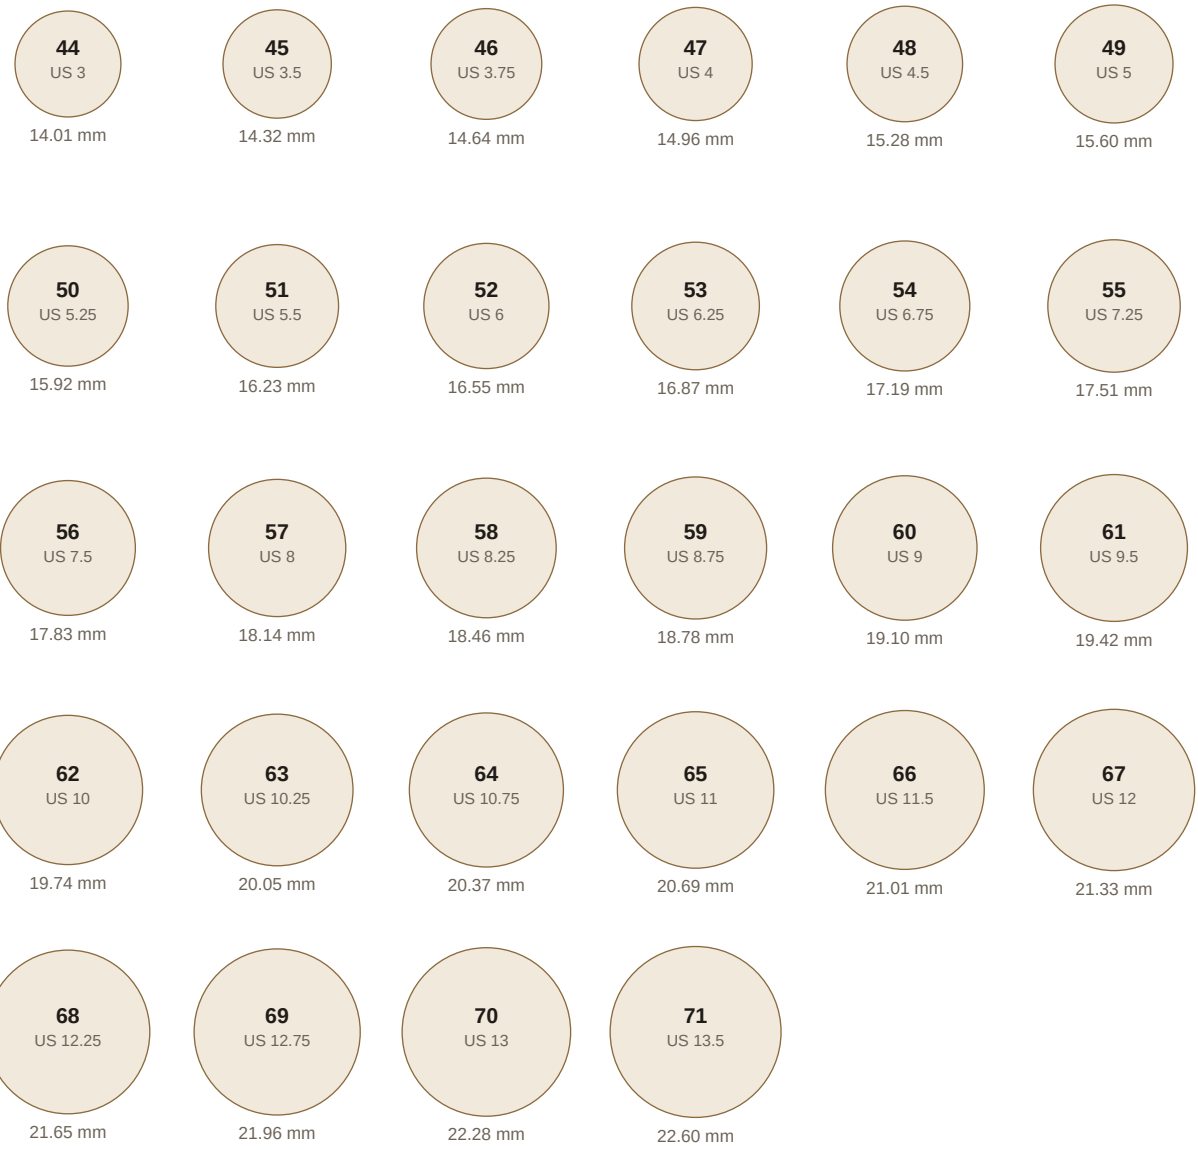

4. We confirm before casting

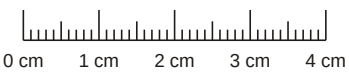

Every ring is made to order. We message you on WhatsApp to confirm the size before the piece is cast, and the first resize within 60 days is free.

Getting the fit right

Small things that change a ring size.

Time of day

Fingers are smallest in the morning and in the cold, largest in the evening and in heat. Measure in the evening at room temperature.

Knuckles

The ring must pass over the knuckle. If the knuckle is much wider than the base, choose a size between the two and tell us; we can fit a hidden sizing bead.

Band width

Wide bands (6 mm and more) feel tighter. Go up half a size for comfort-fit or wide eternity bands.

Eternity bands

Stones all round mean the ring cannot be resized later. We double-check these sizes with you on WhatsApp before casting.

Left and right

The dominant hand is usually about half a size larger. Measure the exact finger the ring is for.

Still unsure

Order anyway. We send a sizer with the first delivery in the UAE and India on request, and the first resize within 60 days is on us.
